#### What's Exciting About This Course

This course is exciting because it provides the opportunity to understand and evaluate the people, policies and the influences that impact the political system and structure of Texas. The content has its own level of excitement since the state is receiving so much attention because of its economic and political significance. Beyond that, the current response to current COVID pandemic, the focus on the conflict of voting restrictions and the arrest warrants for members of the state legislature is getting national attention. There is speculation that the actor Matthew McConaughey might be a candidate for Governor, as well as an effort to build a border wall with private contributions ...sort of *go fund me campaign*. It all sounds like a crazy new reality show or a fictional novel.

The most exiting component is your engagement in the learning process and the changing nature of the political characteristics of the state. We will explore the potential impact of these changes.. Your participation and involvement in the learning process and class activities in highly encouraged. Not only is this part of the required curriculum competencies, but this will be an essential ingredient in your enjoyment and success in this class.

This course is designed to go far beyond the mere presentation, memorization and testing of data. It will promote each student's involvement in the learning process. I will encourage you to take an active role by reading, completing assignments and the independent learning exercises, as well as participation in activities. I am looking forward to a positive and mutually beneficial learning experience! Please communicate and ask for assistance if necessary. Most importantly, **Relax and enjoy!**

## Departmental Practices and Procedures

---

The study of government and politics engages students with practices and issues that generate conflict. In light of the nature of the class you are enrolled in, it is important to understand that what you learn may challenge some of your beliefs. This kind of intellectual stretch is at the heart of higher education. Though some of your beliefs may be challenged, only you can decide to retain or change them. Consider the following quote from Rogers Smith, past president of the American Political Science Association :

*"[A]ny political science teaching worthy of the name must examine controversial political matters and must present unpopular views concerning those subjects. The more teaching about politics is done by teachers who feel themselves to be in highly vulnerable positions, wary of offending taxpayers, governmental officials, or corporate donors, the more likely it is that political science teaching will be done in ways that simply canvass conventional perspectives, rather than promoting wide-ranging critical reflection and deeper public understanding of important political concerns."*

Social Science Research Council, *Transformations of the Public Sphere*, 8.

## Instructor's Course-Specific Information

This is a face to face lecture course that will also have course content posted on the canvas shell. Even though the course will have a lecture component, there will be an emphasis on student engagement/participation. The course will be divided into three Modules.

There will be three exams that will consist of some form of short answer/ narrative component. There will also be an essay/narrative component that will focus on critical thinking posted on the canvas Modules. This will be submitted on line on-line per the schedule. These three assignments are designed for test preparation that will be based on the textbook, lectures, PowerPoint slides activities and simulations. The final is a regular test that will carry equal value to the other exams and will be non-comprehensive. Please note that the test will become completely narrative focusing on critical thinking if we transfer to the on line modality.

Additionally there will be four in-class activities/simulations that will be submitted as canvas discussions. There will also be a variety of non-graded in class activities. You will have three options for the submission of a class project. A syllabus quiz will be administered at the beginning of the semester to make sure you understand the policies and procedures of the class.

I will build the course on the Canvas Modules and you will allowed to submit most of your content on-line. Prior to each exam, I will post the applicable PowerPoint slides for your review. Since the focus of the exams will be related to critical thinking, do not wait to use this as your primary study tool. I will post the the slides in case we need to transition to the on-line modality. Attendance and engagement in class, as well as the assignment is is far more effective strategy.

Please note that you will have the opportunity to select certain certain components to achieve the assessment points, but I will encourage you to complete the entire assessment as the best option for test preparation.

I will use the early alert system to identify any academic assistance and will offer tutoring based on your request. Please note there is no formal system of extra credit at this time. I will certainly let you know if that becomes available. You will have the opportunity to earn bonus points during the semester.

## Devices

Electronic devices are acceptable in class because they could be useful in the content of the course, but they must be used exclusively for course content!

## Additional Information

## Departmental/Program Information

The Houston Community College Government Department supports students in a number of different ways. These include:

- **Government Majors & Minors:** Students can earn an Associate of Arts Degree in Government, which will prepare them for majoring in Political Science or Government when they transfer to a university. Majors and Minors—those students who are interested in Political Science or Government—are supported by a faculty committee that will connect them to events, news, and opportunities.
- **Careers in Government:** The study of Government or Political Science prepares students for work in the public and private sectors by emphasizing critical thinking, analytical, and communication skills.
- **Government Student Organizations:** The Government Department supports the activities of the *Center for Civic Engagement* and the HCC *Political Science Club*, both of which hold discussions and sponsor events to connect students to politics in the real world.
- **GOVT Scholarship:** The Government Department will work with students to locate scholarship support, when possible.
