

Department: Life Sciences (Biology)

<b>Introduction to Biology</b> Fall 2012 Biol 1308 CRN# <a href="#">26584</a> and <a href="#">27386</a>
---

Course location and times:	<a href="#">Online through HCCS Eagle Online</a>
Course semester credit hours:	3 Semester Credit hours
Course contact hours:	48 hrs lecture
Course length:	16 weeks
Instruction type:	Online

Instructor:	<a href="#">Nicole Ducharme, Ph.D.</a>
Phone:	713-718-7771
Email address:	<a href="mailto:nicole.ducharme@hccs.edu">nicole.ducharme@hccs.edu</a> or <a href="mailto:nad982.geo@yahoo.com">nad982.geo@yahoo.com</a>
Office location and hours:	By appointment only

**COURSE DESCRIPTION:**

Topics include basic chemistry, cell morphology and physiology, photosynthesis and respiration, cell division, and classical and molecular genetics.

**COURSE PREREQUISITES:**

College Level Reading as determined by SAT, ACT, TASP or successfully passing ENGL0305 with “C” or better.

**COURSE GOALS:**

This course is an introduction to biological chemistry, biological processes, cellular morphology, metabolism, heredity, and molecular genetics.

**PROGRAM LEARNING OUTCOMES**

Program SLO #1: To recognize, identify, and describe the basic structures and functions associated with most life forms.

Program SLO #2: To develop basic laboratory techniques appropriate to the field of Biology.

Program SLO #3: To develop study skills and habits appropriate for pre-professional students interested in health-related fields.

## **COURSE STUDENT LEARNING OUTCOMES**

1. Describe scientific terminology and learn accurate use of them in living organisms
2. Define principles of living organisms including physical and chemical properties of life.
3. Understand function at the level of molecules and cells, to include biological macromolecules, cellular organization, communication, and cell division.
4. Understand energy transformations and the metabolic reactions associated with cellular activities, such as the processes of glycolysis, fermentation, cellular respiration, and photosynthesis.
5. Explain the molecular sequence of events involved in the flow and expression of genetic information in prokaryotic and eukaryotic cells, with special emphasis on the understanding of DNA replication, RNA transcription, and protein biosynthesis and mutation.
6. Understand basic knowledge of Mendelian genetics, perform and interpret genetic problems. Describe advances made in the understanding of genes and chromosomes since Mendel.
7. Apply scientific method of asking a question, developing and testing hypothesis by experiments, collecting and writing organized reports. Develop critical thinking and distinguish theory from a hypothesis.

## **LEARNING OBJECTIVES**

1. Consistently able to demonstrate knowledge of scientific terminology, and its complete use in living organisms
2. Consistently able to demonstrate knowledge of principles of living organisms and complete knowledge of physical and chemical properties of life.
3. Able to explain the function at the level of molecules and cells, to include biological macromolecules, cellular organization, communication, and cell division.
4. Able to explain and apply the knowledge of energy transformations
5. Able to explain the metabolic reactions associated with cellular activities, such as the processes of glycolysis, fermentation, cellular respiration, and photosynthesis.
6. Consistently able to explain the molecular sequence of events involved in the flow and expression of genetic information in prokaryotic and eukaryotic cells
7. Able to explain the process of DNA replication and RNA transcription, protein biosynthesis and mutation.
8. Consistently demonstrates knowledge of Mendelian genetics
9. 100% proficiency in performing and interpretation of genetic problems.
10. Able to describe advances made in the understanding of genes and chromosomes since Mendel.
11. Consistently differentiates between appropriate and inappropriate experimental design. Takes appropriate steps or explains appropriate steps independently and correctly.
12. Is able to distinguish theory from hypothesis on their own

## **INSTRUCTOR SPECIFIC COURSE STUDENT LEARNING OUTCOMES:**

*After completing this course, students generally will be able to*

1. Initiate, understand, assess, and assume responsibility for one's own ongoing learning process.
2. Access, assess and use learning resources effectively.
3. Clarify personal values, purposes and goals
4. Understand and respect differences

*After completing this course, students specifically will be able to*

5. Analyze how biology class relates to their own personal goals and/or major as well as their personal life
6. Describe the basic components of life including cell structure, function and reproduction, respiration, and photosynthesis.
7. Explain the "central dogma" of cell biology.

8. Solve Mendalian genetics problems and relate the concepts to their own families
9. Summarize how technology is impacting the availability of personal biological data and determine their personal stance on utilizing such information.

Successful completion of this course should provide the student with a good introduction to biological sciences and a grasp of biological principles. This will allow them to function as knowledgeable and informed citizens in a society that demands a greater sophistication in the modern sciences, particularly as they pertain to molecular technology, forensic and judiciary matters, environmental, and medical issues.

<b>Intro Bio Tentative Course Calendar (Fall 2012):</b>		
<i>All items are due at 11:55PM unless otherwise noted</i>		
<b>Week</b>	<b>Chapter/Due date</b>	<b>Related Activities</b>
1	<b>Chapter 1: Introduction</b> <b>Due Date: September 2</b>	Plagiarism Quiz Introduction Chapter quiz Andromeda
2	<b>Chapter 2: Chemistry</b> <b>Due Date: September 9</b>	Chapter quiz Electron Orbitals Chemical Bonds
	<b>Exam 1 (ch 1-2) (Due September 12)</b>	
3	<b>Chapter 3: Molecules of Life</b> <b>Due Date: September 16</b>	Chapter quiz Biological Molecules
4	<b>Chapter 4: Tour of the cell</b> <b>Due Date: September 23</b>	Chapter quiz Cell Simile
5	<b>Chapter 5: Working cell (Energy, enzymes and membranes)</b> <b>Due Date: September 30</b>	Chapter quiz Enzymes
	<b>Exam 2 (ch 3-5) (Due October 3)</b>	
6	<b>Chapter 6: Cellular Respiration</b> <b>Due Date: October 7</b>	Chapter quiz Measure Respiration
7	<b>Chapter 7: Photosynthesis</b> <b>Due Date: October 14</b>	Chapter quiz Website
	<b>Exam 3 (ch 6-7) (Due October 17)</b>	
8	<b>Chapter 8: Mitosis and Meiosis</b> <b>Due Date: October 21</b>	Chapter quiz Website
9	<b>Chapter 9: Inheritance (Mendel, linked, sex)</b> <b>Due Date: October 28</b>	Chapter quiz Genetics Modules
10	<b>Chapter 10: Structure and Function of DNA</b> <b>Due Date: November 4</b>	Chapter quiz DNA to protein Module
	<b>Exam 4 (ch 8-10) (Due November 7)</b>	
11	<b>Chapter 11: Gene Regulation (and cancer)</b> <b>Due Date: November 11</b>	Chapter quiz HeLa Cells Iceland
12	<b>Chapter 12: DNA Technology</b> <b>Due Date: November 18</b>	Chapter quiz Virtual Labs Genetic Profile

13	<b>Thanksgiving Week (November 22)</b>	
14	<b>Chapter 13: Evolution</b> <b>Due Date: December 2</b>	Chapter quiz Evolution in TX What do I believe
	<b>Exam 5 (ch 11-13) Due December 9</b>	
15	<b>Due Date: December 12</b>	Final Exam

### **INSTRUCTION METHODS:**

Eagle Online will be utilized this course and students are expected to log onto Eagle Online at least weekly. Students will read assigned pages in textbook and view available Animations/videos.

Student Assignments:	Students are required to read assigned chapters, participate in discussions, complete assignments and complete chapter quizzes.
Student Assessments:	Students will be assessed via substantive participation in discussions, completion of assignments, chapter quizzes, lecture exams and a comprehensive final.

### **INSTRUCTOR REQUIREMENTS**

You are spending a good deal of time, energy and money on this course – please, make the most of your investment! It takes approximately **3 hours of study time for each hour of class time to master the material**. This class will have the equivalent of 48 lecture hours (3 hr. credit)

**The class and study time necessary to succeed in this class will be around 192 hours (12 hours per week)!**

#### **Attendance Policy**

HCCS instructors are required to submit attendance frequently. For the DE classes, one report is submitted after the first week of class. If I do not receive any kind of contact through Eagle Online from you either by submitting the first assignment, participating in the first discussion or sending an email, you will be counted absent and you will be automatically dropped from the class. After that you can still be dropped if you miss several weeks' worth of work with no communication.

#### **HCC Policy Statement: Internet Outage Policy**

If your professor experiences an Internet service outage or a power outage that significantly affects the timing of distributing on-line assignments, or in any way appreciably hinders the professor in communicating with students, adjustments to due dates and/or grades will be made appropriately. If there is any official notification from HCCS concerning downtime of the BB Internet course server that would affect distributing assignments, or in any way appreciably hinders the professor in communicating with students, adjustments to due dates and/or grades will be made appropriately. This policy pertains only to the professor's INTERNET SERVICE or to HCCS's Internet course servers, not the students' computers or Internet access. No one at HCCS can monitor or verify outages at student sites and student access is not the responsibility of HCCS. Students are responsible for making sure that they have continuous, reliable Internet access in order to complete this course.

**DEPARTMENT GUIDELINES:**

Students are expected to conduct themselves as adults. This includes courteous and respectful behavior towards instructor and classmates. Disruptive behavior or any behavior that interferes with any educational activity being performed by the instructor will not be allowed. Additionally, no student may interfere with his/her fellow students’ right to pursue their academic goals to the fullest in an atmosphere appropriate to a community of scholars. Disruptive behavior may result in removal from the class.

**BASIC REQUIREMENTS**

HCC Grading Scale:	A = 100 – 90;.....4 points per semester hour B = 89 – 80: .....3 points per semester hour C = 79 – 70: .....2 points per semester hour D = 69 – 60: .....1 point per semester hour 59 and below = F .....0 points per semester hour IP (In Progress) .....0 points per semester hour W(Withdrawn).....0 points per semester hour I (Incomplete).....0 points per semester hour AUD (Audit) .....0 points per semester hour  IP (In Progress) is given only in certain developmental courses. The student must re-enroll to receive credit. COM (Completed) is given in non-credit and continuing education courses. To compute grade point average (GPA), divide the total grade points by the total number of semester hours attempted. The grades “IP,” “COM” and “I” do not affect GPA.
--------------------	--

**GRADE CALCULATION**

Chapter quizzes (~10 pts/chapter * 13 chapters)	130
Discussions/Assignments	445
Chapter Exams	225
Final Exam	200
Extra Credit	Up to 50 points
Final Score	1000

**CHAPTER QUIZZES**

Quizzes will be posted on Eagle Online and occur as posted in the schedule. They will serve as a way to ensure that you are learning the material and keeping up with the course content.

**CLASS DISCUSSIONS**

Most chapters will have an associated discussion topic. Students are required to post their answers for the group to see. Often, you will be asked to comment on the work of others.

**ASSIGNMENTS**

Often, the best way to learn something is to apply it to your own life. Therefore, we will have a variety of assignments that ask you to think about how the topics we are studying impact your life.

## **LECTURE EXAMS**

There will be five lecture exams that ask you to apply what we have learned. Most often, this will take the form of applying what we have learned to experimental designs and critical thinking.

## **FINAL EXAM**

A comprehensive final examination will be given online.

## **EXTRA CREDIT**

Opportunities for extra credit will be available throughout the semester to boost your grade up to half of a letter grade (50 points).

Instructional Materials:	Textbook: Essential Biology with Physiology by Simon, 3rd edition, 2010, Custom Edition for HCC  Web resources: Eagle Online The Learning Web
--------------------------	--

## **DISTANCE EDUCATION RESOURCES**

The Distance Education Student Handbook contains policies and procedures unique to the DE student. Students should have reviewed the handbook as part of the mandatory orientation. It is the student's responsibility to be familiar with the handbook's contents. The handbook contains valuable information, answers, and resources, such as DE contacts, policies and procedures (how to drop, attendance requirements, etc.), student services (ADA, financial aid, degree planning, etc.), course information, testing procedures, technical support, and academic calendars. Refer to the DE Student Handbook by visiting this link: <http://de.hccs.edu/de/de-student-handbook>

## **VIRTUAL CLASSROOM CONDUCT**

As with on-campus classes, all students in HCC Distance Education courses are required to follow all [HCC Policies & Procedures](#), the [Student Code of Conduct](#), the [Student Handbook](#), and relevant sections of the Texas Education Code when interacting and communicating in a virtual classroom with your professor and fellow students. Students who violate these policies and guidelines will be subject to disciplinary action that could include denial of access to course-related email, discussion groups, and chat rooms or even removal from the class.

The following Student Learning Outcomes with their associated assessment criteria are not meant to be all inclusive, and are meant to be used along with all other course learning outcomes and assessment devices, listed under Course Objectives, in the determination of the student's final course grade. Completion of the specific Student Learning Outcomes listed below, at any assessment grading level, does NOT and will NOT guarantee the student that final course grade at the end of the semester!
