

Victor Salinas – Week 3 Homework

This pdf is a good example of how to present work for this class. This was week three in 2022 for Drawing I and your homework will have different images/tasks (depending on the week and semester). The drawings here are very good, as you can see, but also notice that the pdf presentation is terrific: large, clear pictures, 90 degree corners, oriented upright, parallel to the edges, no overlapping, a little extra is shown so I can see to the edge of the page, the batch photos are exactly what I need to assess your work online. –Stan, Fall 2022
