

## **Presentation Guidelines**

**Objective** – The purpose of this class assignment is to practice presentations in preparation for your technical presentations that you will do in your petroleum engineering technology careers

- Four individual presentations
- One group presentation – Thursday, April 12. Shall be longer and more in-depth than individual presentations. Everyone presents to the class.
- Presentations to be done in front of class
- Presentations to be on a subject of interest to you, the student
- Presentation to last at least 10 minutes, but not longer than 15 minutes
- Presentation time includes class questions and discussion

Possible topics you can select (similar to Technical Report Guidelines):

- Any industrial safety topic
- Global events
- Events in the US
- Wellbore equipment
- Facility equipment – flowlines, separators, meters, pumps, compressors, corrosion, gas sweetening, gas dehydration, oil or gas transmission pipelines
- Work processes
- Operating procedures for wells
- Operating procedures for equipment
- Any subject in the class textbook
- Any oil and gas job, career
- Anything on SPE website
