What's Exciting About This Course

This course will focus on the fundamentals of computing and help you to acquire the knowledge and skills to set up and use a computer at home securely and keep it in good working order. You will also learn how to provide informal support for PCs and simple computer networks to your colleagues, such as in a small business.

This course will also prepare you to take the FC0-U61 exam to obtain the CompTIA ITF+ certification, which can serve as the starting point for a career in IT support. Obtaining the CompTIA ITF+ certification will show you that you have the aptitude to pursue a professional-level certification.

My Personal Welcome

Welcome to IT Fundamentals, I am looking forward to working with you and helping you to improve your technology skills at the elemental level. We will explore the key basic areas of computing with the goal of helping you to be proficient and self-sufficient in several domains of personal computing. Whether you are beginning your journey towards a career in IT or

wanting to increase your computer proficiency for personal reasons, it is important to begin with a strong foundational knowledge and then build upon that knowledge as you grow towards your goals.

In relation to teaching and learning in any subject area, I believe that students should be taught the basics or fundamentals, and then guided and encouraged to apply and share concepts learned to various scenarios related to the subject area. They must also be allowed to be creative, explore and experiment with new ideas, as well as make and learn from their mistakes. The product of successful teaching is when the learner or student is able to utilize and apply the fundamentals of what have been taught to higher levels of learning, while achieving their maximum and fullest potential lifelong learning goals

- Reading the textbook
- Attending class in person and/or online
- Completing assignments
- Participating in class activities

There is no short cut for success in this course; it requires reading (and probably re-reading) and studying the material using the course objectives as a guide.
